

## Laboratory Training Signature Page

Laboratories are required to keep records of specific laboratory training provided to personnel. Please print and sign your name and indicate (with an "x" or check mark) if you have been trained on the contents of your laboratory's Supplemental Safety Plan(s) and are familiar with George Mason University's Safety Manual(s). This Laboratory Training Signature Page should be kept in the Safety Records and Resources binder.

In addition to training provided by Environmental Health and Safety, laboratory personnel must receive training specific to the laboratory in which they work. This training should include such topics as risks associated with the hazardous substances in the laboratory, physical hazards present in the laboratory, proper use of instruments and safety equipment, laboratory animal allergies (if applicable), signs and symptoms of exposure to a biological material, and laboratory procedures and protocols.

## By signing below, I certify that I have been trained on the laboratory specific plans indicated below and I am familiar with the manuals as indicated.
